(54) Title: **MULTILAYERED, BREATHABLE TEXTILE FABRIC**

(57) **Abstract:** The present invention relates to a multilayered, breathable fabric and especially, but not exclusively, to a textile fabric for clothing purposes. In a special embodiment, the invention relates to a fabric for manufacturing articles of work clothing for protection against the effects of heat, flames or arcing and the like. Therefore, the invention also relates to an article of fire protection clothing with a novel, breathable, moisture-transporting fabric as the inner layer. However, the textile fabric can also be used in the leisure sector, for example, to manufacture functional undergarments.
